STRONGER TOGETHER

Sell more, easier and faster with TruckDelta

TruckDelta is an online stock management system. In TruckDelta you have all your stock data in one system, including photos and videos.

TruckDelta adapts to what you want to sell

TruckDelta is optimized to fit the sales of (mainly) vehicles. In addition to TruckDelta, you can also choose EquipmentDelta, which is tailored to the sale of (primarily) machines. However, in both systems you can create all types of advertisements, for vehicles, machines and parts. The only difference is the layout of the drop-down menu, so that it is more aligned with Trucks or Equipment.

Sell quickly and easily through 200+ websites

Via TruckDelta, you can link your inventory to more than 200 other websites with just one click, including linking to your own website. This way, you will never have to enter data twice again.

In addition, your ads will stay up to date on all the websites you advertise on. If you change your ads in TruckDelta, it will be automatically updated on all websites where you advertise.

You prepare your inventory in TruckDelta in order to advertise online on TrucksNL and numerous other websites.

Send a newsletter to promote your stock

Through TruckDelta you can send a newsletter to customers containing your stock. We will send you a professional design with your logo. You then choose which stock you want to promote and who you will send the newsletter to.

Switching is easy

The migration to TruckDelta is quick and easy. You can choose to add an "ERP Integration" to TruckDelta. The integration transfers the basic data you enter in your accounting system during initial registration to TruckDelta. All you then have to do in TruckDelta is expand and refine the data. In addition to the ERP integration, there are many other ways to transfer your inventory easily and quickly to TruckDelta. We will be happy to assist you in finding the best way to do this.
